

Deuter Futura 32

8 BACKPACKS TESTED AND RATED Versatile Hiking Packs

The Futura 32 has been awarded „Best Buy“ in the backpack test of German magazine „outdoor“ (issue 04/14)!

30 years after we've launched the world's first mesh back system, German magazine *outdoor* picked eight mesh back hiking rucksacks with a volume of about 30 l for a two-day test in the Black Forest. Key test criteria were the backpack's weight, the volume and the carry comfort.

RATINGS

Hikers who are not only looking for top carry comfort, but also for a thought-through design and highly effective back ventilation will definitely appreciate the good old Deuter "Futura".

RATINGS

Carry comfort ★★★★★☆

It is flexible, extremely airy and lighter to carry than expected. Female hikers, however, might find the hip pads on the women's model irritating. Maximum load capacity 12kg.

Features / Handling ★★★★★★

Rain cover, bottom compartment, side pockets and compartments; nothing missing; great grip buckles are super easy to use

Weight ★★★★★☆

Versatility ★★★★★☆

SUMMARY

We liked in particular the men's model of the new Futura: a solid, airy transporter for any hiking trip.

outdoor
VERDICT

very good
