# SIZING / FIT

## STRATOS - MEN'S SIZING

S/M 16-19" / 40-48 cm

M/L 18-21" / 46-53 cm

## SIRRUS - WOMEN'S SIZING

XS/S 15-18" / 38-46 cm

S/M 17-20" / 43-51 cm

## WOMEN'S SPECIFIC FIT

- + Pack shape is narrower and deeper allowing greater freedom of movement and increased stabilization by lowering the position of the load to a woman's center of gravity.
- + Padding is added to varying points on the hipbelt and harness in order to support carrying a heavy load.
- + The shoulder harness is designed with different curves to create an anatomical fit for a woman's neck, shoulders and chest.
- + The hipbelt is narrower in height so it doesn't dig into the ribs or upper thighs when scrambling, climbing or biking.
- + Women's hips are conically shaped with a larger difference between the waist and hip measurements. The hipbelts are shaped and angled to accommodate this difference which allows a more comfortable load transfer and support.
